FILL IN THE FIELDS OF A HIVE

The screenshot shows a mobile application interface for adding a new hive. The top bar is orange and contains the time 9:03, a 'Cancel/back' button, and a save icon. The main form is dark grey and includes the following fields and features:

- Name:** A text input field with a 'Save the hive' annotation pointing to the save icon.
- ID:** A text input field.
- Model:** A text input field.
- Number of frame:** A text input field.
- Hive's general appreciation:** A slider with an orange knob. An annotation points to it: 'Evaluate the hive according to criteria of personal appreciation'.
- Add picture:** A button with a camera icon.
- Year:** A text input field. An annotation points to it: 'The evaluation appears in the main field of the hive.'
- Breed:** A dropdown menu showing 'Hive 01' and 'Last entry 03/09/2022'.
- Origin of new bees:** A text input field.
- Queen's origin:** A text input field.
- Queen's year:** A text input field.
- Clipped queen:** A toggle switch.
- Marked Queen:** A toggle switch.
- Notes:** A text input field. An annotation points to it: 'Evaluate colony's aggressivity'.
- Sociability:** A slider with a green knob, currently set to 'Very calm'.

At the bottom of the screen, there is a yellow hexagonal button with the number '9'.

STRUCTURE OF THE HIVE

Add rise

Add grid

Add a queen excluder

Add in timeline

Shows the structure of the hive in the "Timeline"
Explanation of the "Timeline" on page 24

When creating the hive, if your hive is made up of a hive body or a single removable element (eg Warré hive) leave it as it is and click on "Add in timeline"

STRUCTURE THE HIVE 2

9:05

In the example below, the hive is composed of a basic element (body) at the bottom, a queen excluder in the middle and a rise above

03/09/2022

The screenshot shows a list of three elements in a white-bordered box. Each element consists of an icon, a date, and a horizontal line. The first element has a white plus icon, the date '03/09/2022', and a white line. The second element has a queen excluder icon (a red circle with a white bee), the date '03/09/2022', and a white line. The third element has a white plus icon, the date '30/08/2022', and a white line. To the right of the list is a red double-headed vertical arrow, indicating that the elements can be reorganized. A blue arrow points from the text box above to the first element, and another blue arrow points from the text box above to the right side of the list.

Add rise

Add grid

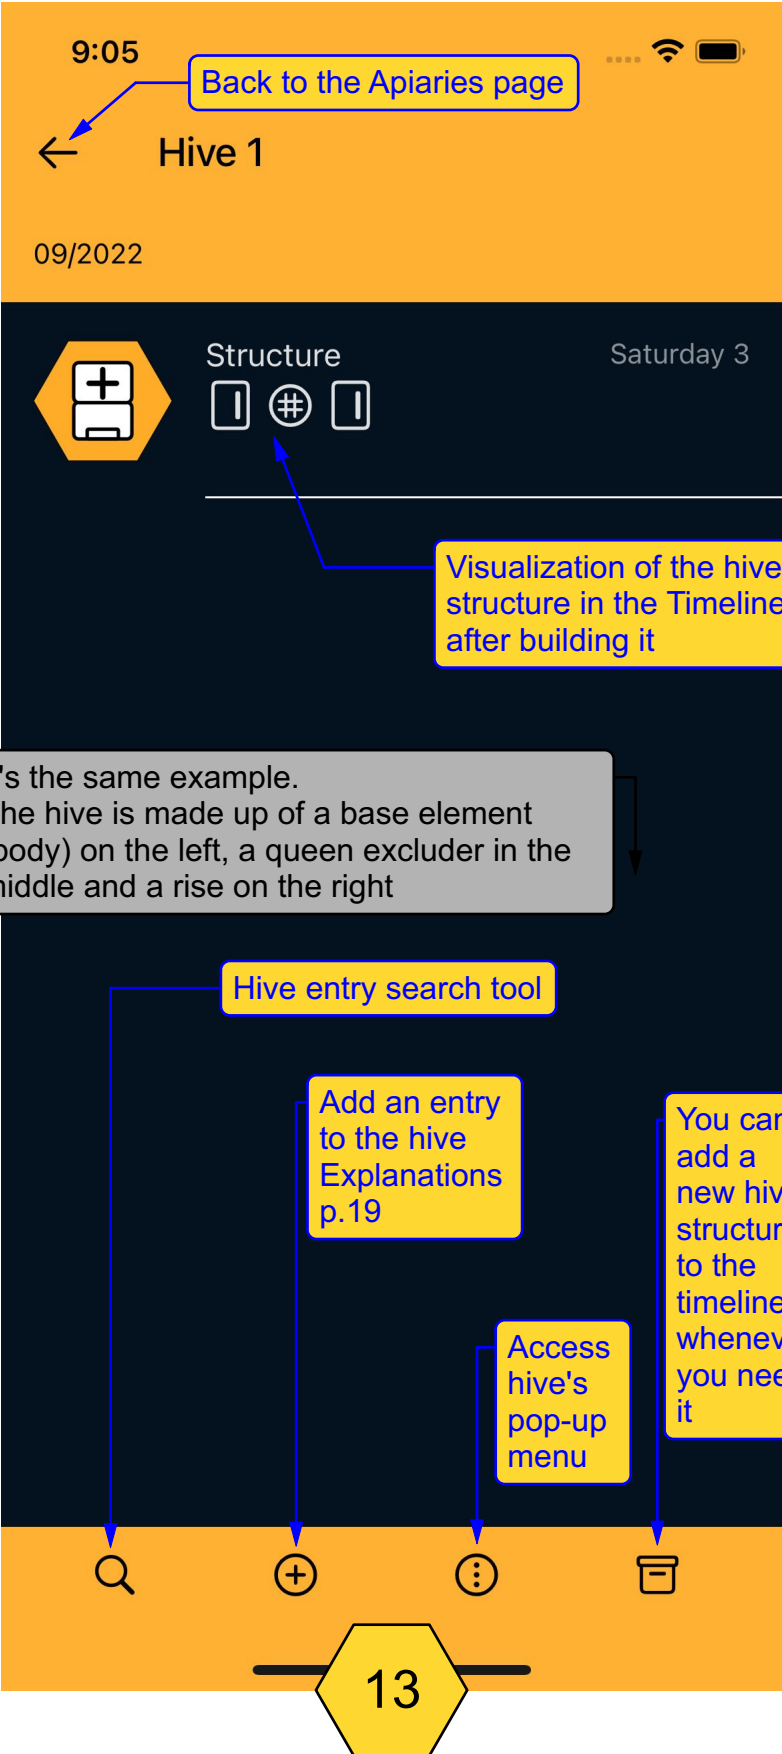

Add in timeline

When you add a rise, for example, you just have to put an element above it. If you are installing a queen excluder, add it between two elements.

The new hive configuration is added to the "Timeline" as of the date at the top of the page. (see page 13)

LONG PRESS allows you to reorganize the order in which the elements of the hive are arranged
